2020

DIGEST OF MEDICAL AND HEALTH STATISTICS

BY STATE BUREAU OF STATISTICS, EKITI STATE.

FOREWORD

The Digest of Medical and Health Statistics is a publication that reveals basic statistical information about medical and health in the State for the year 2020. The publication used secondary data gathered from key health institutions that make up the health sector in the State.

The publication is partitioned into nine chapters comprising of reports, analysis tables and graphical presentations for clearer illustration. Areas covered by the publication are facilities, human resources, in-patients, out-patients, discharges, deliveries and health financing in the state. Also included are information on major diseases reported in the health facilities, HIV/AIDS cases and children immunisation programme in the State

The Bureau expresses appreciation to the relevant MDA's like Federal Teaching Hospital, Ido Ekiti, Ministry of Health, Hospital Management Board (HMB), Primary Health Care Development Agency (PHCDA), Ekiti State University Teaching Hospital (EKSUTH) and Ekiti State Aids Control Agency (EKSACA) for their continued support at all times.

I am also grateful to the entire staff of the Ekiti State Bureau of Statistics for their cooperation in the production of this publication.

It is hoped that the publication will be useful to policy makers, researchers and other users of statistics both within and outside the State.

Any constructive criticism will be welcomed as this will facilitate improvement in further editions.

Statistician General

Ekiti State Bureau of Statistics

Ado Ekiti.

Ekiti State

CHAPTER ONE

This shows the summary data and indicators generated in the publication.

Table 1.1 shows relationship among key Indicators e.g health facility population ratio, doctors /patient facility ratio, nurses and midwives ratio

CHAPTER TWO

CLASSIFICATION OF MEDICAL AND HEALTH FACILITIES IN EKITI STATE.

The chapter contains information on types, number of health facilities and their ownership in Ekiti State for the year 2020.

Table 2.1 shows that the State had a total number of 527 Health Facilities during the year. There were two tertiary health facilities, twenty two Secondary health facilities and Three Hundred and Twenty Six (326) Primary Health Facilities distributed across the three senatorial districts in the State (See Table 2.2). Government health facilities took the largest percentage of 66.41, while Private hospitals took 33.59.

Also from table 2.3, it can be seen that out of a total of 527 health facilities in the State, Ado local government had the highest number of health facilities with total number of 132 (25%) and Ilejemeje had the least number of 14 (2.7%).

Table 2.4 shows the number of registered pharmaceutical outfits and patent medicine stores. It also reveals the information of pharmaceutical outfits according to categories in the local governments. Ado local government had the largest number of 224(26.26%) pharmaceutical outfits, followed by Ido/Osi with 81 (9.50%), Ijero 74 (8.68%) while Ilejemeje had the least which is 18 (2.11%). See table 2.4 for further information.

. Table 2.5 shows the number of beds in the Hospitals, with a total of 3,249 in 2020 out of which 506(15.57%) were not in good condition. Ido/Osi local government shared the highest number of 562 beds followed by Ado local government with 435beds and Ijero local government with 257 beds. See table 2.6 for detailed information.

CHAPTER THREE

HEALTH HUMAN RESOURCE

The chapter explains information on human resources in the health sector.

Table 3.1 shows health personnel in government owned facilities according to their cadres: Consultants, Doctors, Dental Surgeons, Pharmacists, Nurses /Midwives etc. The table also reveals information of non-health professionals like Statistician, Account Staff, Typists, Messengers and others.

The data was presented according to their health institutions: Primary Health Facility (PHC), Secondary Health Facility/Hospital Management Board (SHC/HMB), Ekiti State teaching hospital, State ministry of health and Federal Medical Centre Ido- Ekiti (THF). In all, the table revealed that the State had a total number of 86 Consultants, 342 Doctors, and 19 Dental Surgeons. There were 1,246 Nurses/Midwives out of which female to male ratio is 85% : 15%.

Table 3.2 shows the distribution of the available Medical consultants/Doctors and Dental surgeon by gender and by local governments. Ido/Osi local government that hosts Federal Teaching Hospital has the largest number of Medical consultant/Doctors and Dental Surgeons of 290 (67.92%) followed by Ado local government that hosts Ekiti State University Teaching hospital which had 49(11.48%).

CHAPTER FOUR

HOSPITAL ACTIVITIES

The chapter shows activities carried out in the public health facilities in the State which includes In-patients, Out-patients, Discharges and Deaths among others. Most of the information are disaggregated by gender, facility and local government.

Table 4.1 shows the summary distribution of out-patients in the public health facilities by gender and type of facility. It could be seen that Primary health facility has the highest percentage of out-patients being 41.70% of 181,302 total figure while tertiary and secondary facilities accounted for 23.94% and 33.94% respectively. In terms of gender distribution, 58.22% of the total out-patients were female while the remaining 41.78% were male.

Table 4.2 distributes outpatients by local government and type of health facility. The table reveals that Ido-Osi Local Government had the highest figure of 46,205(25.49%) followed by Ado with 32,715(18.04%) out of the total of 181,302 outpatients. Ise/Orun had the least of 1.84%

It could be observed from table 4.4 that Ado Local Government had the highest number of in-patients of 10,946 (46.06%), followed in descending order by Ido (15.15%) and Ikole (6.37%). Also, Efon and Emure had the least 1.26% and 1.08% respectively.

Table 4.5 shows the summary data on discharges in public health facilities, out of 22,143 patients discharged, 18.74% were male and the remaining 81.26% were female. Classification of discharges by type of facility shows that, tertiary health facility had the highest of 65.28% while secondary and primary had 28.46% and 6.26% respectively.

Table 4.6 by Local government classification shows that Ado has the highest number of discharged patients of 10,677 (48.22%) out of total 22,143 discharges, Ekiti South West recorded the least of 153(0.69%).

In respect of deaths recorded in the health facilities, table 4.5 reveals a total of 630 out of which male deaths were 177 representing 28.09% while their female counterpart is 453(71.91%). Further observation reveals that Ekiti S/West had two (2) deaths being the least while Ado recorded the highest number of deaths 273 (43.33%) for the year.

In the case of dental problem, table 4.11 shows a total number of 15,641 cases were attended to in the year 2020. Out of this, 12,450 patients were attended to in the primary facilities during the reference year with female attendance slightly higher than that of the male patients. Also, the 600 dental patients in the secondary health facility were attended to. Out of this, 299 male and 301 female were treated for various dental problems

CHAPTER FIVE

ANTENATAL ATTENDANCE AND DELIVERIES

This chapter discussed antenatal attendance, maternal death as well as live and still births in government owned health facilities in Ekiti State for 2020.

Table 5.1 shows the attendance of 16,593 -1st visit and 47,841-follow up visits. Primary health facilities had the largest number of antenatal attendance with 12,847 -1st visit and 31,280-follow up.

Table 5.2 reveals that more deliveries were taken in the primary health facilities than in other health facilities. In the Primary health facilities, there were 5,440 (64.73%) live births out of the total 8,701 recorded in government health facilities. Secondary and tertiary had 1,542 and 1,719 in 2020 respectively. Female live births were more than their male counterpart in the year. Female live births were 4,402 compared with male which was 4,299. Ado local government has the largest number of live births with 29.26% of the total live-births recorded while Ilejemeje was least with 166 (1.91%) live births.

Table 5.3 shows a total of 163 still births were recorded in 2020. Secondary and tertiary health facilities had 65 and 80 respectively while primary had just 18 despite handling the highest number of births. From this table also, it could be seen that Ado Local Government recorded 71 (43.56%) out of the total 163 still births.

CHAPTER SIX

RECORDS OF PREVALENT DISEASES IN HEALTH FACILITIES

This section covers record of diseases prevalent in the State's health facilities for 2020.

Table 6.1 shows the summary table of malaria cases recorded for the year by gender and by health facilities. From this table, primary health facilities had the highest percentage of 56.51%, secondary had 26.35% and tertiary had only 17.14%. Also, classification by gender shows that female had higher prevalence of 27,155 cases representing 59.46% while males accounted for 40.54% of cases recorded.

Table 6.2 contains information on malaria cases classified by type of health facility, gender and local government. The data revealed that a total of 45,666 malaria cases were reported. Also, Ido/Osi local government has the highest number of malaria cases reported with the least coming from Moba local government.

Table 6.3 shows summary cases of measles by gender and health facilities, more cases were reported at the primary health facilities than the secondary and tertiary health facilities.

Table 6.4 shows further distribution of cases by gender, health facilities and by local government for the year. Highest number of cases was recorded in Ado local government with 32 (20.78%) out of the total 154 cases.

From the available information, table 6.5 shows that, diarrhoea cases reported in 2020 were 1,226 while that of the dreaded- case of hypertension reported was 11,595 (table 6.7). 4,564 males and 7,611 females were diagnosed with this dreaded disease in the year.

CHAPTER SEVEN

HIV/AIDS

Table 7.1 shows there were a total of 34,713 persons tested for HIV/AIDS out of which only 647 tested positive in the year. Among them were 213(32.92%) male and 434 (67.08%) female respectively. Out of the 434 female that tested positive, 60 were pregnant and 374 were not pregnant. See the table for details.

Tables 7.4 and 7.5, shows the projected population of 3,785,001 in 2020. A small proportion of the population of 0.92% were tested for HIV/AIDS out of which 0.02% were positive. It was also revealed that 154 health facilities and missions have HIV/AIDS diagnostic facility as shown in table 7.6.

CHAPTER EIGHT

IMMUNISATION

This chapter shows details of immunisation given to children under 1 year of age, which covers BCG, Polio, Pentals, Measles and Yellow Fever according to stages (i.e 1 to 5 times).

Table 8.1 show details.
