

DIGEST OF MEDICAL AND HEALTH STATISTICS IN EKITI STATE, 2021

Produced by:
State Bureau of Statistics, Ado-Ekiti

2021

DIGEST OF MEDICAL AND HEALTH STATISTICS

PRODUCED BY STATE BUREAU OF STATISTICS, EKITI STATE.

BY STATE BUREAU OF STATISTICS, EKITI STATE.

FOREWORD

The Digest of Medical and Health Statistics is a publication that reveals basic statistical information about medical and health in the State for the year 2021. The publication used secondary data gathered from key health institutions that make up the health sector in the State.

The publication is partitioned into nine chapters comprising of reports, analysis tables and graphical presentations for clearer illustration. Areas covered by the publication are facilities, human resources, in-patients, out-patients, discharges, deliveries and health financing in the state. Also included are information on major diseases reported in the health facilities, HIV/AIDS cases and children immunisation programme in the State

The Bureau expresses appreciation to the relevant MDA's like Federal Teaching Hospital, Ido Ekiti, Ministry of Health, Hospital Management Board (HMB), Primary Health Care Development Agency (PHCDA), Ekiti State University Teaching Hospital (EKSUTH) and Ekiti State Aids Control Agency (EKSACA) for their continued support at all times.

I am also grateful to the entire staff of the Ekiti State Bureau of Statistics for their cooperation in the production of this publication.

It is hoped that the publication will be useful to policy makers, researchers and other users of statistics both within and outside the State.

Any constructive criticism will be welcomed as this will facilitate improvement in further editions.

CHAPTER TWO
MEDICAL AND HEALTH
FACILITIES

PRODUCED BY STATE BUREAU OF STATISTICS, EKITI STATE.

CHAPTER TWO

CLASSIFICATION OF MEDICAL AND HEALTH FACILITIES IN EKITI STATE.

This chapter contains information on types, number of health facilities and their ownership in Ekiti State for the year 2021.

Table 2.1 shows that the State had a total number of 527 Health Facilities during the year. There were two tertiary health facilities, twenty two Secondary health facilities and Three Hundred and Twenty Six (326) Primary Health Facilities distributed across the three senatorial districts in the State. Government health facilities took the largest percentage of 66.41, while Private hospitals took 33.59.

Table 2.2 shows the distribution of the 326 Primary Health Facilities, out of these Basic Health Centres (BHC) had the highest number of 189(57.98%), followed by CHC with 48(14.72%), Health Post was 39 (11.96%)

Also from table 2.3, it can be seen that out of a total of 527 health facilities in the State, Ado local government had the highest number of health facilities with total number of 132 (25%) and Ilejemeje had the least number of 14 (2.7%).

Table 2.4 shows the number of registered pharmaceutical outfits and patent medicine stores. It also reveals the information of pharmaceutical outfits according to categories in the local governments. Ado local government had the largest number of 224(26.26%) pharmaceutical outfits, followed by Ido/Osi with 81 (9.50%), Ijero 74 (8.68%) while Ilejemeje had the least which is 18 (2.11%). See table 2.4 for further information.

. Table 2.5 shows the number of beds in the Hospitals, with a total of 3,249 in 2021 out of which 506(15.57%) were not in good condition. Ido/Osi local government shared the highest number of 562 followed by Ado local government with 435 and Ijero local government with 257. See table 2.6 for detailed information.

CHAPTER THREE

HEALTH HUMAN RESOURCES

PRODUCED BY STATE BUREAU OF STATISTICS, EKITI STATE.

CHAPTER THREE

HEALTH HUMAN RESOURCES

The chapter explains information on human resources in the health sector. Table 3.1 shows health personnel in government owned facilities according to their cadres: Consultants, Doctors, Dental Surgeons, Pharmacists, Nurses /Midwives etc. The table also reveals information of non-health professionals like Statistician, Account Staff, Typists, Messengers and others.

The data covers categories of health institutions: Primary Health Facility (PHC), Secondary Health Facility/Hospital Management Board (SHC/HMB), Ekiti State teaching hospital, State ministry of health and Federal Medical Centre Ido- Ekiti(THF). In all, the table revealed that the State had a total number of 86 Consultants, 342 Doctors, and 19 Dental Surgeons. There were 1246 Nurses/Midwives out of which female to male ratio is 85%:15%.

Table 3.2 shows the distribution of the available Medical consultants/ Doctors and Dental surgeon by gender and by local governments Ido/Osi local government that hosts Federal Teaching Hospital has the largest number of Medical consultant/Doctors and Dental Surgeon of 290 (67.92%) followed by Ado local government that hosts Ekiti State University Teaching hospital had 49(11.48%).

FIG: 3.1

PRODUCED BY STA

CHAPTER FOUR

HOSPITAL ACTIVITIES

PRODUCED BY STATE BUREAU OF STATISTICS, MISSISSIPPI

CHAPTER FOUR

HOSPITAL ACTIVITIES

The chapter shows activities carried out in the public health facilities in the State which includes In-patients, Out-patients, Discharges and Deaths among others. Most of the information are disaggregated by gender, facility and local government.

Table 4.1 shows the summary distribution of out-patients in the public health facilities by gender and type of facility. It could be seen that primary health facility has the highest percentage of out-patients being 39.99% out of 259,407 total figure while tertiary and secondary facilities accounted for 37.37% and 22.64% respectively. In terms of gender distribution, 58.49% of the total out-patients were female while the remaining 41.51% were male.

Table 4.2 distributes outpatients by local government and type of health facility. The table reveals that Ido-Osi Local Government had the highest figure of 86,880 (33.49%) followed by Ado with 33,280 (12.83%) out of the total of 229,407 outpatients. Ilejemeje had the least percentage of 1.59%

The summary of in-patient in government health facilities is contained in table 4.3. The table reveals that primary, secondary and tertiary health facilities respectively accounted for 27.95%, 32.39% and 39.66% of 32,148. Further observation however, reveals that male to female inpatients stood at 52.64% : 47.36%.

It could be observed from table 4.4 that Ado Local Government had the highest number of in-patients of 9,879 (30.73%), followed in descending order by Oye (26.98%) and Ido (10.87%). Also, Irepodun/Ifelodun and Ise/Orun had the least of 1.17% and 1.01% respectively. Distribution of in-patients across other local governments in 2021 shows that Ikole has 5.78% and Ijero has 5.48%. Male to female in-patients for the year was 16,922 (52.64%) : 15,226 (47.36%). Table 4.5 shows the summary data on discharges in public health facilities, out of 26,472 patients discharged, 60.88% were male and the remaining 39.12% were female. Classification of discharges by type of facility show that, tertiary health facility had the highest of 45.92% while secondary and primary had 35.72% and 18.35% respectively.

Table 4.6 by Local government classification shows that Ado has the highest discharges of 9,605 (36.28%) out of 26,472, Ekiti West recorded the least of 170 (0.64%).

In respect of deaths recorded in the health facilities, table 4.7 reveals a total of 752 deaths out

of which male were 549 (73.01%) while their female counterpart was 203 (26.99%).

From table 4.8, observation reveals that Ekiti S/West had three (3) deaths being the least while Ado recorded the highest number of deaths of 336 (43.35%) for the year.

Table 4.9 contains the comparative analysis of hospital activities including deaths, discharges, in-patients and out-patients. It can be observed that out-patients were eight times the number of in-patients. In fact, there were 259,407 outpatients as against 32,148 in-patients. See the table for more information.

According to table 4.10, the total number of patients that received eye services were 999,841 in the Tertiary facilities while 158 patients received the services in the secondary facilities in 2021. It was also observed that the number of males treated were slightly higher than the female patients with eye problems in the year 2021.

In the case of dental problem, table 4.11 shows a total number of 15,641 cases were attended to in the year 2021. Out of this, 12,450 patients were attended to in the primary facilities during the reference year with female attendance slightly higher than that of the male patients. Also, the 600 dental patients in the secondary health facility were attended to. Out of this, 299 male and 301 female were treated for various dental problems

CHAPTER FIVE
ANTENATAL ATTENDANCE AND DELIVERIES
IN HEALTH FACILITIES

PRODUCED BY STATE BUREAU OF STATISTICS, ERSS, STATE.

CHAPTER FIVE

ANTENATAL ATTENDANCE AND DELIVERIES

The chapter discussed antenatal attendance, maternal death as well as live and still births in government owned health facilities in Ekiti State for 2021.

Table 5.1 shows the attendance of 14,440 at -1st visit and 50,257-follow up visits. Primary health facilities had the highest number of antenatal attendance with 10,776 -1st visit and 33,914-follow up.

Table 5.2 reveals that more deliveries were taken in the primary health facilities than in other health facilities. In the primary health facilities, there were 5,440 (64.73%) live births out of the total of 8,404 recorded in government health facilities. Secondary and tertiary had 1,763 and 1,201 respectively in 2021. Female live births were more than their male counterpart in the year. Female live births were 4,717 compared with male which was 3,687. Ado local government has the highest number of live births with 25.35% of the total live-births recorded while Efon was least with 74(0.88%) live births.

Table 5.3 shows a total of 160 still births were recorded in 2021. Secondary and tertiary health facilities had 74 and 63 respectively while primary had just 23 despite handling the highest number of births. From this table also, it could be seen that Ado Local Government recorded 63 (39.38%) out of the total 160 still births.

CHAPTER SIX
PREVALENT DISEASES REPORTED IN PUBLIC
HEALTH FACILITIES

PRODUCED BY STATE BUREAU OF STATISTICS, EKITI STATE.

CHAPTER SIX

RECORDS OF PREVALENT DISEASES IN HEALTH FACILITIES

The section covers record of diseases prevalent in the state for year 2021. Table 6.1 shows the summary table of malaria cases recorded for the year by gender and by health facilities. From this table, primary health facilities had the highest percentage of 65.94%, secondary had 21.83% and tertiary had only 12.24%. Also, classification by gender shows that female had higher prevalence of 46,651(61.60%) cases while male accounted for 29,075 (38.40%) of cases recorded.

Table 6.2 contains information on malaria cases classified by type of health facility, gender and local government. The data revealed that a total of 75,726 malaria cases were reported. Also, Oye local government has the highest number of malaria cases reported with the least coming from Ise/Orun local government.

Table 6.3 shows summary cases of measles by gender and health facilities, more cases were reported at the primary health facilities than the secondary and tertiary health facilities.

Table 6.4 shows further distribution of cases by gender, health facilities and by local government for the year. Highest number of cases was recorded in Ise/Orun local government with 25 (24.04%) out of the total of 104 cases. Ekiti East, Ekiti West and Moba have no recorded cases of Measles during the year under reference.

From the information gathered, table 6.5 shows that, total diarrhoea cases reported in 2021 were 1,226 while that of the dreaded- case of hypertension reported was 14,652 (See Table 6.7) with 5,383 male and 9,269 female were diagnosed with this dreaded disease in the year.

CHAPTER SEVEN
HIV/AIDS

PRODUCED BY STATE BUREAU OF STATISTICS, EKITI STATE.

CHAPTER SEVEN

HIV/AIDS

The chapter shows that there were a total of 48,765 persons tested for HIV/AIDS out of which only 1,426 tested positive in the year. Among them were 513(35.97%) male and 913(64.03%) female. Out of the 913 female that tested positive, 92 were pregnant and 821 were not pregnant. (See table 7.1)

Tables 7.4 and 7.5, shows the projected population of 3,908,080 in 2021,number of people tested, number tested positive either pregnant or not. A small percentage of the population of 1.25% were tested for HIV/AIDS out of which 0.036% tested positive. It was also revealed that 292 health facilities and missions have HIV/AID diagnostic facility as shown in table 7.6.
